

Shipping & Mailing

Outbound and Inbound Package Management

SendSuite Xpress & Ascent

What's New in SendSuite Xpress 3.40 & Ascent 10.40

IMPORTANT

You must be at SendSuite Xpress v3.30/Ascent v10.30 to perform this update.

- All carrier manifests except POS, POM, and PON should be Closed and Printed.
- Carrier manifests for POS, POM, and PON should be Closed, Printed, and Opened for a New Day.

UPS Updates

UPS revised and added new business rules for 2019:

- An additional handling charge will now be assessed for shipments to European Countries in which the longest side of the package is greater than 100 cm.
- UPS has revised the fuel surcharge calculation to include net revenue associated with Signature Required, Adult Signature Required, Additional Handling, and Peak Additional Handling.
- A large package surcharge will now be applied to international and domestic packages based on the address type. UPS now has a different surcharge for commercial and residential addresses.
- The Saturday Delivery special service is now allowed with standard service to Canada and standard service to Mexico shipments.
- The Hazmat table has been updated to include all year-to-date UPS Chemical table revisions.
- UPS has updated the extended area surcharge data.
- UPS has upgraded UPSLink to version 22.09 which supports the TLS 1.2 protocol.
- For 2019 Label compliance, UPS has made the data matrix barcode mandatory on Pickup summary Label.

FedEx Updates

- Hold at location shipment request and response now includes the FedEx Facility Location ID.

General Updates

- SendSuite Xpress Analytics server and client have been updated to support TLS 1.2.
