DM400™ Digital Mailing System

# Flexible simplicity

**In-house control made simple.**
Take control of your communications and process your mail quickly. It's easy to do with the Pitney Bowes DM400 digital mailing system. It can handle any size job all while sealing and printing accurate postage so that you are never paying more.

- Easy operation with intuitive design.
- QWERTY keyboard provides easy operation.
- Handle oversized mailpieces and parcels.
- Updates, software and instantly.
- Preset your ten most common jobs and process mail at the push of a button.

The DM400 gives you the flexibility to configure the right solution for your business allowing you to take control of your communications, easily. You select the speed, weighing platform, accounting reports and promotional capabilities that fit your goals and budget. Streamline your operation and cut costs with the DM400.

Reset postage easily

Built-in strip tape dispenser

Automatic feeding at up to 90 letters per minute

Integrated weighing

Seal envelopes automatically

Feed envelopes up to 8mm thick automatically

Clearly labeled keys and all-in one dashboard

Crisp images and quiet operation

**For more information, visit us online.**

## Achieve faster efficiencies.

The DM400™ accommodates and processes a variety of mail sizes without the need for operator assistance. Automatic feeders load your mail and extended rollers feed it more consistently than gravity fed systems. It even outperforms hand-fed systems. The DM400 is so efficient even inexperienced operators can manage daily mail quickly and accurately.

## Adapts to your needs

Use the 5Kg integrated scale to weigh and rate packages automatically. Process mixed-weight letters and flats at the same time with differential weighing. You can even accommodate larger parcels by adding compact 7Kg, 12Kg or 35Kg platforms and transform your mailroom into a full-service shipping center.

## Turn insight into action.

It's crucial for businesses to account for postage expenses. Departmental or client postage spend can be easily tracked and reported with the 25 standard accounts on the DM400C™; these can be upgraded to either 50, 100 or 300 accounts, if required.
## Connect to real savings.

With the DM400, you're connected 24/7. There's no need to move the mailing system or to install a costly phone line to download postage and update software. Simply connect to your LAN for fast and convenient access.

## Standard operating features

Auto-dating (Australia Only), low postage alert, high value protection, original value resetting, seal only and no seal modes, low ink alert, password security, envelope graphics and postal inscriptions.
