1 - Introduction

In this section

Demographics

Demographics are descriptors of people and places. The demographic data described begins with people but is summarized at Census Block Group level.

Pitney Bowes U.S. GroundView® Demographic Data for the United States is a comprehensive set of over 8,200 variables. The same has been divided into multiple topics with few hundred variables for better consumption and analysis.

For reference, see the *U.S. Demographic & Business Summary Data Product Guide*. You can download the document in PDF format from here: **U.S. Demographic & Business Summary Data Product Guide**.

Demographics Lookup

Demographics suite consists of an H2 database named demographics_index. This database contains pbkey linked to the bkg_key. This bkg_key in the demographics_index database can be looked up in the demographics attribute database using the pbkey field defined.

Field Name	Field Type	Description
pbkey	char (17)	pbKey™ unique identifier
bkg_key	char (12)	Unique value for demographics data records.

Installation

1. Download your database(s). The database is downloaded as a .tar.bz2 file.

2. Extract the .tar.bz2 file.

3. Extract the .tar file.

   Note: Population by Hispanic/Non-Hispanic data is provided as 4 data packages: Census 2010 (2k) dataset (groundview_population_by_hispanic_nonhispanic_2k.7z), Five-year (5y)

projections dataset (groundview_population_by_hispanic_nonhispanic_5y.7z), Census 2010 dataset (by) (groundview_population_by_hispanic_nonhispanic_by.7z), and Current year (cy) estimates dataset (groundview_population_by_hispanic_nonhispanic_cy.7z). Refer **GroundView®: Population by Hispanic/Non-Hispanic** for more details.

4. Copy the data to any directory. Note the file name and path.

   Note: You may install databases on a mapped drive, but performance will be affected since you will be accessing them on a network rather than accessing them locally.

5. After you install the database files, you will need to define the database as a resource.

For more information, see "Adding a GeoEnrichment Module Database Resource" in the applicable version of the *GeoEnrichment Guide* at **support.pb.com/spectrum**.

Address Fabric Version Compatibility

These databases require Address Fabric October 2017 vintage.

The Address Fabric is based on November 2017 geocoding data.

2 - Data Layouts

In this section

GroundView®: Population by Hispanic/Non-Hispanic

Estimates of population characteristics such as the population distributions by age, sex, marital status, race, and Hispanic origin follow a similar top-down bottom-up process. At the block group unit of analysis, the latest and best information from the Census Bureau's American Community Survey (ACS) – the largest household survey in the US – is integrated with Census 2010 data to produce timely, accurate small-area estimates. Population characteristics are estimated using demographic estimation and projection models to achieve a preliminary set of estimates which are then reconciled to top-down estimates using iterative proportion fitting.

Population by Hispanic/Non-Hispanic data is provided as 4 data packages: Census 2010 (2k), Five-year (5y) projections, Census 2010 dataset (by) and Current year (cy) estimates dataset and include variables such as:

- Sex by Age (Hispanic or Latino)

- Sex by Age (Not Hispanic or Latino)

- Hispanic or Latino by Specific Origin
