1 - Introduction

In this section

Demographics

Demographics are descriptors of people and places. The demographic data described begins with people but is summarized at Census Block Group level.

Pitney Bowes U.S. GroundView® Demographic Data for the United States is a comprehensive set of over 8,200 variables. The same has been divided into multiple topics with few hundred variables for better consumption and analysis.

For reference, see the *U.S. Demographic & Business Summary Data Product Guide*. You can download the document in PDF format from here: **U.S. Demographic & Business Summary Data Product Guide**.

Demographics Lookup

Demographics suite consists of an H2 database named demographics_index. This database contains pbkey linked to the bkg_key. This bkg_key in the demographics_index database can be looked up in the demographics attribute database using the pbkey field defined.

Field Name	Field Type	Description
pbkey	char (17)	pbKey™ unique identifier
bkg_key	char (12)	Unique value for demographics data records.

Installation

1. Download the data zip to a directory on your computer.
2. Unzip the data, to find the base data zip with the documentation link file.
3. Unzip the base data folder to find the final .h2.db file.

> **Note:** For example, if you have downloaded the zip file with name **Groundview_Business_Summary_AK_H2DB201803.7z**, then you need to extract this file to find another zips named as **groundview_business_summary_naics_attribute.7z**,

groundview_business_summary_sic_dataset1_attribute.7z, and **groundview_business_summary_sic_dataset2_attribute.7z** with a documentation link file and an index file named as **demographics_index_AK.7z**. Finally extract any of the zip file such as, **groundview_business_summary_naics_attribute.7z** to find the **groundview_business_summary_naics_attribute.h2.db** as final data file.

4. Copy the data to any directory. Note the file name and path.

   Note: You may install databases on a mapped drive, but performance will be affected since you will be accessing them on a network rather than accessing them locally.

5. After you install the database files, you will need to define the database as a resource.

   For more information, see "Adding a GeoEnrichment Module Database Resource" in the applicable version of the *GeoEnrichment Guide* at **support.pb.com/spectrum**.

   After downloading data and installing the Spectrum Client you need to configure the GeoEnrichment Module in the Spectrum, for data processing. For that, follow the steps mentioned in the document available **here**.

Address Fabric Version Compatibility

These databases require Address Fabric October 2018 vintage.

The Address Fabric is based on October 2018 geocoding data.

GroundView®: Business Summary - NAICS & SIC

Pitney Bowes Business Summary database contains aggregations of business establishments, employment, occupation, payroll, and retail sales for all standard census geography levels, as well as for ZIP Codes and Designated Market Areas. The primary source for the Business Summary Data is the PB U.S. Business Points File of nearly 14 million businesses in the U.S. The database is derived from continually updated multiple sources, including telephone listings, city directories, annual reports, and 10K filings. The PB Business Summary Data provides tabulations and estimates using both the North American Industrial Classification System (NAICS) and Standard Industrial Classification (SIC) system.

Business Summary Data is bundled as three data packages: Business Summary NAICS Dataset (1 bundle of variables), and Business Summary SIC Dataset (2 bundles of variables) and include different variables for different dataset bundles which are listed below:

NAICS Dataset

- Estimates of Total Employees, Total Establishments, Payroll, and Retail Sales (N)

- Employees by Occupation (N)

- Employees by Major Industry (N)

- Establishments by Major Industry (N)

- Employees by Type of Business (N)

- Establishments by Type of Business (N)

- Payroll by Major Industry (N)

- Establishments by Size of Business (N)

- Employees by Type of Retail Business (N)

- Establishments by Type of Retail Business (N)

- Retail Sales by Type of Retail Business (N)

- Employees by Type of Service Business (N)

- Establishments by Type of Service Business (N)

SIC Dataset #1

- Estimates of Total Employees, Total Establishments, Payroll, and Retail Sales (S)

- Employees by Occupation (S)

- Employees by Major Industry (S)

- Establishments by Major Industry (S)

- Employees by Industry (S)

- Establishments by Industry (S)

- Payroll by Major Industry (S)

- Establishments by Size of Business (S)

SIC Dataset #2

- Employees by Type of Retail Business (S)

- Establishments by Type of Retail Business (S)

- Retail Sales by Type of Retail Business (S)

- Establishments by Type of Service Business (S)

- Employees by Type of Service Business (S)

NAICS Description
